

claims 48-56 and 60 were provisionally rejected under Section 103(a), and claims 43-47 and 65-78 were allowed. In response thereto claims 57-64 have been cancelled and new claims 77-141 have been added.

Claims 43-47 and 65-76 were allowed. The allowance of these claims is acknowledged with appreciation and they remain in the application.

The new claims include independent claims 77, 83 and 97. Brief discussions of the patentability of each of these independent claims follow. The claims depending therefrom are patentable for at least those reasons.

New independent claim 77 is old claim 60 rewritten in independent format. Old dependent claim 60 had only a provisional rejection under Section 103(a).

Step (a) in the independent claim 83 (see FIG. 37) is not taught by the prior art, nor are the construction and printable media of claim 97.

The subject matter of the '308 application and the claimed invention were, at the time the inventions were made, owned by Avery Dennison Corporation. Copies of the assignments of this application and the '308 application are attached.

It is thus respectfully submitted that the subject application is in condition for allowance. If there are any remaining issues, the Examiner is encouraged to telephone counsel at (310) 788-5053 to seek to resolve them.

Please charge any additional fees required by this paper or credit any overpayment to Deposit Account No. 16-2230.

Respectfully submitted,

Douglas N. Larson
